

PAVISHNU S

Python Developer | Generative AI | FastAPI & SQL
Bangalore, Karnataka, India | +91 81442 81008 | sspavishnu16@gmail.com
linkedin.com/in/pavishnu152 | github.com/pavishnu152

Professional Summary

B.Tech IT graduate (2026) with hands-on experience building AI-powered applications using Python, FastAPI, and RAG pipelines. Delivered 4 end-to-end projects including a CNN+BiGRU model achieving **96.39% accuracy** and an ATS analyzer with **95.5% skill detection accuracy**. Seeking Python Developer or Software Engineer roles in Bangalore to contribute from day one.

Technical Skills

Programming Languages: Python, SQL
Generative AI: RAG, LangChain, ChromaDB, FAISS, Ollama, Prompt Engineering, Embeddings, Semantic Search
Machine Learning: Scikit-learn, TensorFlow, Keras, CNN, BiGRU, Pandas, NumPy, Data Preprocessing, Model Evaluation
Frameworks / Tools: FastAPI, React.js, Streamlit, Git, GitHub, MySQL, SQLite, Render, VS Code, Google Colab
Concepts: REST APIs, Backend Development, OOP, Data Structures, Vector Search, API Integration, Model Inference

Projects

AI-Powered Enterprise Document Insight System github.com/pavishnu152/Enterprise-Doc-Insight
Python, FastAPI, LangChain, ChromaDB, FAISS, Ollama

- Built RAG pipeline achieving **92% answer relevance** and **85%+ citation-grounded accuracy** across document responses
- Reduced response latency by **35%** through optimized Ollama local LLM inference — zero external API dependency
- Improved semantic retrieval relevance by **28%** using vector embeddings and chunk-based retrieval (ChromaDB, FAISS)
- Designed modular FastAPI backend for scalable document ingestion, indexing, and real-time query handling

ConvoLens AI — Audio-to-Text Meeting Assistant github.com/pavishnu152/ConvoLens-AI
Python, Streamlit, AssemblyAI, LM Studio

- Developed AI meeting assistant with real-time audio transcription, LLM-based summarization, and key-point extraction
- Integrated AssemblyAI speech-to-text API supporting multi-speaker audio and video input processing end-to-end
- Implemented structured insight generation pipeline delivering auto-summarized meeting notes, eliminating manual documentation
- Designed interactive Streamlit interface for seamless usability without requiring any technical user setup

AI Resume Analyzer github.com/pavishnu152/AIRESUMEANALYZER
Python, FastAPI, React.js

- Achieved **95.5% role-aligned skill detection accuracy** using transformer embedding semantic relevance scoring
- Increased resume keyword recall by **40%** through semantic skill matching vs standard ATS keyword filtering
- Built FastAPI backend with React.js frontend for automated ATS scoring and role-based resume evaluation pipelines
- Generated structured AI skill gap insights to guide candidates for MNC-level ATS optimization

Parkinson's Disease Detection System github.com/pavishnu152/Parkinson-Disease-Prediction-System
Python, TensorFlow, Keras, Gradio — Hybrid CNN + BiGRU Deep Learning

- Built hybrid CNN+BiGRU deep learning model for Parkinson's disease detection from MRI scans, achieving **96.39% accuracy**
- CNN extracts spatial features (texture, structure, intensity) from 224×224 MRI images; BiGRU learns forward and backward feature relationships
- Deployed Gradio web app with automated PDF medical report generation, confidence score display, and Excel patient records storage
- Evaluated using precision, recall, and F1-score on augmented MRI brain image dataset with full data preprocessing and normalization pipeline

Education

Bachelor of Technology (B.Tech) – Information Technology 2022 – 2026
Velalar College of Engineering and Technology, Erode, Tamil Nadu **CGPA: 7.0**

Higher Secondary Certificate (Class 12) 2021 – 2022
Navarasam Matric Higher Secondary School, Erode, Tamil Nadu **67.9%**

Secondary School Leaving Certificate (Class 10) 2019 – 2020
Navarasam Matric Higher Secondary School, Erode, Tamil Nadu **95.5%**

Certifications

- Machine Learning with Python – Coursera
- Python for Data Science and AI – Udemy
- Claude Code Certification
